

***Nabieh Ayoub***

He began his scientific career at the Hebrew University where he received a BA in Biology; obtained a master degree with distinction in Genetics under the supervision of Prof. Jacob Wahrman, and pursued his Ph.D. with Prof. Amikam Cohen at Hadassah Medical School. Nabieh did his post-doctoral training at the MRC-Cancer Cell Unit in Cambridge with Prof. Ashok Venkitaraman. On 2010, Nabieh established his own lab at the Technion, Israel Institute of Technology, to follow his long-term interests in chromatin biology and DNA damage repair. He was promoted to the degree of Associate Professor with tenure on January 2016.
